PROFESSIONAL SUMMARY

Full Stack Web Developer with 1.5+ years of production experience delivering secure SaaS platforms, document processing systems, REST APIs, and browser extensions. Built and shipped 8+ live browser extensions, reduced database query response times by 40% through indexing and optimization, and built multi-tenant applications with advanced RBAC. Skilled in Laravel, PHP, MySQL, React, Next, Blade/Tailwind, and MVC architecture, with additional experience in the MERN stack.

EXPERIENCE

Full Stack Web Developer

Jun '25 — Present

Devonsite

Lahore, Pakistan

- Architected and deployed 3+ production Laravel applications, implementing secure file processing workflows with encrypted storage and automated cleanup.
- Designed MySQL databases with proper indexing and normalized schemas; optimized multiple slow queries reducing response times by ~40% on large datasets.
- Applied MVC architecture with service layers for scalability, successfully debugging production issues and collaborating on client deliverables ahead of schedule.
- Implemented secure authentication and role-based access control for multi-tenant applications, while collaborating with a 4-person development team using Git and Bitbucket workflows.

SKILLS

Backend Laravel, PHP, REST APIs, MVC Architecture, Node.js, Express.js

Frontend HTML, CSS, Javascript, Tailwind CSS, Bootstrap, Blade Template, React.js

Databases MySQL, MongoDB

Tools Git, GitHub, Bitbucket, Chrome MV3

AI Development Claude, Codex, Antigravity, Cursor, Github Copilot

PROJECTS

PDFToolBox – Laravel Document Processing Platform [Link](#)

- Developed full-stack PDF processing SaaS handling 1,000+ monthly conversions with merge, split, compress, and format conversion capabilities
- Engineered secure file handling system with SHA-256 encryption, temporary storage with 24-hour auto-deletion, and rate limiting
- Implemented service-oriented architecture separating business logic from controllers, significantly reducing code duplication by 50% across PDF operations

CV Builder [Link](#)

- I upgraded the frontend build system from outdated tools to Vite, migrated the project from Laravel 9 to Laravel 12, and contributed to and refactored a production CV/Resume Builder built with Laravel and Next.js.
- Redesigned the maximum UI by adopting Tailwind CSS across all pages, ensuring visual consistency, mobile responsiveness, and improved performance.
- Added new user-facing features and refactored the majority of existing pages, improving code quality and maintainability throughout the codebase.

ToolsCase - Web Utility Platform [Link](#)

- Built and expanded a modular web utility platform featuring 35+ browser tools, 108 PDF tools, and a CV Builder, while contributing to 8 live browser extensions.
- Developed reusable components, dynamic routing, middleware-based authentication, and scalable backend workflows.

Browser Extensions — 8+ Products Shipped [Link](#)

- Built and shipped 8+ live browser extensions, with additional products actively in development and new releases being submitted for publication.
- Developed browser-based products across AI, productivity, document processing, image utilities, and workflow automation.

EDUCATION

Bachelor of Science in Computer Science, NCBA&E (GPA: 3.64/4.0)

Nov '20 — Nov '24

Lahore, Pakistan
